Changing lives stitch by stitch

Kenana Knitters

I came to Kenana Knitters in 2004 to look for work, I had a six month old child at the time and I needed some income. I had seen my neighbours knitting and they said they were working for Kenana. I was very interested in the work they were doing.

When I came to Kenana, Paddy asked one of the permanent knitters to teach me how to knit. When I had finished my training, I started to get patterns for work. I have been working as a knitter for over 14 years!

Esther, enjoys knitting giraffes of all kinds, her best patterns are the spider giraffe and bush baby giraffe.

I want to tell women out there that they should not sit at home. They should come and work at Kenana where they will meet many others like them. They will be able to earn a decent living and best part is they will be working among other women in a stress free environment.
