Changing lives stitch by stitch

## Kenana Knitters

Veronica joined Kenana Knitters in 2011, she was encouraged to join the knitters by her two sisters in law Naureen Vihenda and Mildred Afande who were already knitters. When she came to the knitters they had already taught her how to knit and all she need to learn was how to finish products.

Veronica is a mother of 3 children aged between 3 and 12 years. The income that she earns helps to supplement the household budget. Her husband is very supportive and works at a local flower farm.

*The income I earn from knitting has given me confidence as a woman. I have a steady income and I am able to provide financial support to my husband. I am also a member of three women's self-help groups. I one of my groups we do table banking and joint investments. Through the groups I have been able to buy a big water tank to harvest rain water for my family and I have also invested in tents and chairs for hire. I am really thankful to Kenana Knitters as they really empower the women in the local community.*
